

CHL5233: Quarto in-class assignment

Luna Jia Ning Zhan

For this exercise, we will use the following two data sets.

1. `countries.txt`: A data set that contains a list of countries used in the paper “Implications of armed conflict for maternal and child health: A regression analysis of data from 181 countries for 2000–2019” and their three-digit ISO (International Organization for Standardization) code.
2. `regions.txt`: A data set that contains a list of all major countries in the world and their
 - a. ISO code (`country_code`)
 - b. region (`region`)
 - c. sub-region (`sub_region`)
 - d. numerical region code (`region_code`)
 - e. numerical sub-region code (`sub_region_code`)

Read in data and create an analytical data set

Min.nchar: 4	Min.nchar: 3
Max.nchar: 32	Max.nchar: 3

```

```

There are 186 countries in the countries dataset.
